Hello Darius and Moana:

It's my understanding that you will be helping RMIB I with some of the lift on completing the nitroguanidine-substituted neonicotinoid PIDs, with a focus on helping build the Appendix As and Bs (Label Tables).

This is a quick meeting to introduce you to the neonic registration review project, its status, and where to find the documents on SharePoint that are relevant to this effort.

Thank you,  
Meg Hathaway
